THE STATE FAIR.

COMPLETE LIST OF THE RACING ENTRIES.

The Pool-Selling Privileges Bound Up Like an Off-Repeated Chestnut—Appointments, Etc.

The Directors of the State Agricultural Society held the meeting usually set for this season of the year on Saturday, August 4th, for the consideration of the entries to races to be held during the State Fair, and other arrangements incidental to the opening of the fair.

The malcontents, and those who are struggling for patronage more than for the interest or welfare of the Society, made their usual fight about the pooling privileges, which seems to be the only weapon obtainable by them, to obtain a majority of the Board's votes.

Mr. Shippe said two days before the meeting at which the池票 was let, that the attack made upon him by rival pool sellers was in the main not true. They charged that the Board met in secret session, and let this privilege. This is not so, as a representative of this was present when the contract was let, and it was done in open meeting. An adjourned meeting was held, and one of the Directors, Mr. La Rue, was present, and he voted for the proposal.

Mr. Shippe said that the Board had voted to let the privilege to the highest bidder, and that the same thing was done for years. Last year, Mr. Shippe, et al., were present when the contract was let, and it was done in open meeting. An adjourned meeting was held, and one of the Directors, Mr. La Rue, was present, and he voted for the proposal.

Mr. Hancock, in reply to Mr. La Rue, said that the Board had received no notice to this effect, and that he had not been present at the meeting.

Mr. Hancock, in reply to Mr. La Rue, said that the Board had voted to let the privilege to the highest bidder, and that the same thing was done for years. Last year, Mr. Shippe, et al., were present when the contract was let, and it was done in open meeting. An adjourned meeting was held, and one of the Directors, Mr. La Rue, was present, and he voted for the proposal.

DAILY RECORD-UNION

MONDAY, AUGUST 6, 1888

THE DEATH OF GENERAL SHERIDAN.

Few men in the history of this nation have filled larger places in the hearts of the people than its military heroes. Of these, there are none, if we except Washington and Grant, who have been more lovingly enshrined in public affection than Sheridan. His death occurred, at an age when he was justifiably in looking forward to many years more of usefulness. Sheridan was in one respect an exceptional man. He was a soldier so loyal to his calling that no political ambition could call him from it, no business or other allurements for one moment diverted his attention from his office. He was in no sense an ambitious man; the lofty honors he won came to him without seeking upon his part, and as the natural and orderly result of his heroism and performance of duty. It was his courage, his masterly energy, his coolness, foresight and fearlessness in the discharge of duty that made him what he was. He rose from a Captaincy in 1851 to be "Lieutenant-General of the Army" of the greatest Republic of the earth, by virtue of his gallantry, his skill in handling men, his wonderful ability to move large bodies of troops with the least friction and the utmost dispatch, and his devoted patriotism. It was a graceful act upon the part of the nation, a fitting tribute to his worth and his genius, and no more of acknowledgement of his eminent services than was his due, in his last sickness he was made General of the Army, a rank filled by but three others in the history of the Republic. It was because of "great generalship," as Grant put it, that Sheridan achieved success in every military undertaking to which he put his hand. But while so gifted with masterly skill as a soldier, and so charged with that peculiar ability to do just the right thing at the time when most depended upon it, he had civil ability also. He saw his way clearly as a citizen at all times, and his loyalty to the nation and to free institutions was rooted in conviction of the righteousness of the Union cause. He did not hesitate to cast his influence with Congress and against President Johnson, or to remove the Governors of Louisiana and Texas because they were obstacles to the attainment of the ends of reconstruction. In the death of General Sheridan the nation loses one of its greatest heroes and one of its best friends. Such men as he come to bless a people but rarely, and that such as have been given to the American people have been respected, honored, exalted and loved as has Sheridan, is one of the best evidences of the vitality of the American principle, adhesion to Unionism, and of the entertainment by the people of the gratitude a nation should manifest for its benefactors and saviors.

AN ASSURED SCHEME.

It is reported that a New York scientist is about to erect in Washington and in New York "safe-deposit" buildings for the storage of bodies of the dead. His idea is to construct a large building on the safe deposit plan, with long corridors, to be used as vaults. In these are to be placed the remains of the dead. The building is to be absolutely fireproof, and as durable as modern science can make it. This storage house may consist from a thousand to ten thousand storage vaults, and may be from three to six stories high. It is to be so arranged that it may be indefinitely extended. The materials will be of the concrete and practically indestructible except by dynamite. The originator of the scheme claims that in such a building bodies cannot be stolen, and friends can view them whenever so disposed. Provision is to be made for detecting premature interment by an electrical apparatus so adjusted that a slight movement in a casket will cause an alarm.

If there is any likelihood that the projector of the structures described will attempt to carry out his plan, there should be such interference by municipal authority as will effectively check his activity.

The erection of these tombs can serve no good end. It might respond to a funeral sentiment, but beyond that would be absolutely offensive, besides being dangerous to the living. The day for catacombs of the dead has passed forever. The storage of human bodies, no matter by what process preservation from decay may be attempted, will not prevent the flesh from crumbling at last into dust. The Egyptians practiced the embalming and entombing art more successfully than any other people have or will; yet even the mummies after thousands of years at last enter upon the stage of decay that resolves them into the primal condition of their constituents.

Such storage houses would menace public health, not perhaps so much as does the system of burial, but they would cast off noxious gases and be liable to disseminate disease. Even if it is conceded that for a long series of years bodies might be preserved in these vast cold storage rooms, the time would come when those remains for which storage rental was no longer paid—because of its burdensomeness upon families, the cost increasing enormously with each generation, and because of the extinction of families—must be taken from the storage vault and buried or cremated.

Failure would, at best, therefore, be but a matter of time, and the measure of that would be the vitality of the sentiment that employed the new-fangled device.

It is in a sentimental sense without value, for the desire to view decaying or withering, and therefore repulsive remains, is but short-lived, even where most profoundly entertained; whereas the sentiment that inclines the mourner to linger about the grave, is due largely to the fact that it is impossible to view side body, and the imagination is therefore left free to reproduce mental images of our lost as we loved to see them best. Whatever disposal of the remains of our dear ones is of such a character that we may, if we choose, look upon the dead, the privilege is very rarely availed of because of the repelliveness of the necessary disclosure, and the horror of the inevitable shock to the sensitive and sore-hearted. In whatever light the new idea of the storage and preservation of human corpses is viewed, it presents itself as unnecessary, uneconomic, and as altogether objectionable as to justify authoritative interference to prevent it, if the projector should make the attempt to carry out his absurd scheme, and since it has in it the promise of financial profit he may endeavor to do so.

"I am performing the last sad write," murmured the lawyer, as he drew up the sick man's will.—*The Inter.*

SPECIAL DISPATCHES TO THE RECORD-UNION.

THOMAS JEFFERSON HENLEY.

An Incident in the Life of the Ex-Commissioner of Agriculture.

[Copyright, 1888, by the California Associated Press.]

WEDNESDAY, AUGUST 8.—The statement that Barclay Henley had thrown over to the Democratic ranks is not true. The Republicans have caused a great deal of comment here among those who know and especially account for the evidence of how California will go in November.

There is a good story of Henley's father, Thomas Jefferson Henley, going the rounds of the city. In the meantime Mrs. Moore (as, she signs herself on the register) says that Mr. O'Neil is constantly under the care of a physician.

Had she well enough there is little room for doubt that the return of the bride and bridegroom to the Capital would have been a source of much interest and quite probably the latter's fate also.

Mrs. O'Neil Number One could not be seen to-night, but Mrs. Charlotte Moore, the head of the Women's League of this city, responded to the query of your reporter that she was still in the city.

She said that everything went well, and that the case had been referred to the Courts of St. Louis in the hope that some sort of justice would be done.

Mr. Henley, too, seemed in the best of spirits, and was apparently enjoying the hospitalities of his physician.

The bride and bridegroom attended church at St. Matthews, the fashionable Catholic church in the city. In the meantime Mrs. Moore (as, she signs herself on the register) says that Mr. O'Neil is constantly under the care of a physician.

There is a good story of Henley's father, Thomas Jefferson Henley, going the rounds of the city. In the meantime Mrs. Moore (as, she signs herself on the register) says that Mr. O'Neil is constantly under the care of a physician.

CANADIAN TOWNS AND VILLAGES
SWEEP BY FIRE.

Plot of the Austrian Anarchists
Emin Bey* and Stanley—A
Panic in Messina.

(SPECIAL DISPATCHES TO THE RECORD-UNION.)

ANARCHIST PLOTS.
Discovery of an Alleged Plot to Capture
Austrian Officers.

VENICE, August 5th.—Continuous ar-
rests have been made since Thursday
morning of suspected Socialists in Berlin,
Vienna, and several other European
places. They are supposed to be connected
with an alleged anarchist plot in Vienna
for a simultaneous attempt to rob the post-
offices and banks in Austria and South-
ern Germany.

An Imperial Austrian decree has been
signed by the whole Cabinet to suspend
trial by jury in the charges against the
anarchists throughout five provinces, includ-
ing Lower Austria, Styria, Carinthia, and
Slovenia. The decree is to remain in force one year.

The decree is based upon the discovery
of extensive preparations to try to capture
Government offices and the money which
is stored there and which are least pro-
tected.

The Austrian anarchists hold constant
conversations with their brethren in France,
England, Switzerland and America. Only
a small section of the German anarchists
are affiliated with them.

A REIGN OF TERROR.

ROME, August 4th.—There is a panic in
the volcano near the city burst
into violent eruption and immense clouds
of smoke and fire have been sent up into the
air. Much mud has been blown over and into
the houses of the neighboring villages.

Haggin ran second with Monson in the
Saratoga stakes for two-year-olds on Saturday,
but his colt was disqualified for foul-
ing. Haggin's colt was 10th.

Mrs. Langtry will soon leave her Long
Beach home, accompanied by a lady friend.

A colored woman of Orlando, Fla., was
promptly cured of rattlesnake poison by
the application of a madstone to the wound.

Five more bodies have been found in the
burned New York tenement—one woman
and four men. The remains were unrec-
ognizable.

Haggin ran second with Monson in the
Saratoga stakes for two-year-olds on Saturday,
but his colt was disqualified for foul-
ing. Haggin's colt was 10th.

Bucksboro, a thriving little town of 1,500
inhabitants in Virginia, was completely de-
stroyed by fire on Saturday. Ten stores and
dwellings were burned. Loss, \$35,000.

Early Saturday morning an attempt to
fire the two-story tenement on East Ele-
ment street, New York, took place, but
was discovered by the police. Several families
occupied the house.

Charles Perkins, alias Watson, who killed
seven horses and one horse belonging to
Mrs. Moore, in the Choctaw nation, ten
days ago, and killed two United States
marshals and one citizen on Saturday in
resisting arrest.

Captain W. H. Caldwell, of Ten-
nessee, V. D. Johnson, of Indiana, J. T.
McMillan, of California, John Winman, of
Michigan, and Oscar Young, of Virginia,
were honorably discharged from the
navy with one year's pay, their being no
vacancies for them.

A SAID MISTAKE.

Discovery that an Innocent Man was
Hanged for Murder.

OTTAWA (Ont.), August 5th.—The execution
of a young man named Millman at
Charlottetown, last Friday, came to the
knowledge of his friends and relatives on
the scaffold, and they succeeded in
saving him.

The tension between Italy and France is
expected to be at a most serious character.

Receiving Leopold has received word that he
may expect good news from Stanley shortly.

The French Embassy at London dis-
courages a reception to Bonhanger on his
visit to England.

In Germany it is believed that a collision
will result from the difference between
France and Italy.

The Parthenes will make the best fight
they know how before the special commis-
sion to inquire into the Times charges.

The House of Commons will finish the
Parnell commission bill to-day, and it
will probably be passed by the House of
Lords in a few days.

It is expected that the murderer will be
captured in a few days.

CANADA.

Towns and Villages Overwhelmed by
Forest Fires.

OTTAWA, August 5th.—Bush fires are
devastating every direction. War-
ton Burton, adjoining this city, is
on fire, and hundreds of citizens have
run away to prevent the flames from crossing
the city limits. Eureka, a small village
containing fifty houses and stores and a large
factory, has been entirely destroyed by
the flames.

The Vistula river, in Russia, has
overflowed its banks and inundated the country
around Minsk. The Moldan continues to
rise, and the water is over its banks. The
inhabitants have been forced to remove to
higher ground.

Report of the terrible excesses of
robbers in the surrounding districts are
swept out of existence. The houses were
occupied by military bands, who lost every-
thing, many of the hands barely escaping with
their lives.

Several handsome buildings are being
erected at Redding.

James Campbell, a railroad switchman,
was killed at Needles.

The salmon pack on the Columbia was
better than last year.

At 1 A.M. on Tuesday the Pioneers
descended the house of 6 to 5.

Maryville during the past week has
been very busy handling fruit and grain.

Several handsome buildings are being
erected at Redding.

James Campbell, a railroad switchman,
was killed at Needles.

The salmon pack on the Columbia was
better than last year.

The Secretary of State of Oregon has for-
warded to Washington \$40,000 in Indian
war claims.

Stony Pure Fiction.

BERLIN, August 5th.—The North German
Gazette is authorized to state that the
recently published in the "Neue Freie Presse,"
Berlin, of the marriage of Prince Victor
of Prussia to Princess Victoria of Prussia
is a pure invention.

The Secretary of State of Oregon has for-
warded to Washington \$40,000 in Indian
war claims.
